

You are Invited!

Water, Weather, Climate and Community Workshop VII:

How is Climate Change Affecting N.H.'s Wildlife Right Now?

Tuesday, July 23, 2013

5:00-8:30 p.m.

Hugh Gregg Coastal Conservation Center at the Great Bay Discovery Center
89 Depot Road, Greenland, N.H.

Directions: <http://www.greatbay.org/visit/index.htm>

What is the connection between N.H.'s declining moose populations and the skimpy shrimp catch off N.H.'s coast in the last two years? And what is happening to N.H.'s birds? Join conservation planners, wildlife enthusiasts, and neighbors in this workshop hosted by the Coastal Adaptation Workgroup and National Wildlife Federation. Everyone interested in wildlife is welcome! Bring a co-worker, friend, neighbor or family member!

The workshop is **FREE**, but space is limited. A light dinner will be provided. [Click here to register](#). Please register by **July 19**. Contact Sharon Hughes at Sharon.hughes@unh.edu or 862-1029 with registration questions.

What to Expect

- Hear from expert biologists on the health trends of moose, shrimp and birds and the connection with climate change.
- Learn about the N.H. Ecosystems and Wildlife Climate Change Plan to help better manage wildlife in our changing climate.
- Find out how you can help monitor N.H.'s natural resources through phenology, the study of plant and animal life cycle events and how these are influenced by climate variations.

Draft Agenda

- 5:00 Food and Networking
- 5:45 Welcome and Introductions
- 6:00 Too Warm for Moose? N.H. Fish and Game (NHFG) Biologist Kris Rines
- 6:30 What is Happening to N.H.'s Shrimp? NHFG Marine Biologist Jessica Carloni
- 7:00 Effects of Climate Change on N.H. Birds, NH Audubon Wildlife Biologist Dr. Pam Hunt
- 7:30 Taking Action for Wildlife--How to Deal with a Changing Climate, NHFG Wildlife Biologist Emily Preston
- 8:00 Tracking the Impacts of Climate Change on Wildlife in Your Own Backyard, N.H. Sea Grant and UNH Cooperative Extension Specialist Alyson Eberhardt
- 8:30 End

This series is coordinated by the N.H. Coastal Adaptation Workgroup which convened in 2010 to help New Hampshire's coastal watershed communities learn about and utilize existing resources and locate additional assistance to better prepare for climate effects in order to protect their social, economic, human and environmental health.
